Cooking duck is easy!

Some people think that duck is difficult to prepare, but it is easy to yield a crispy, delicious duck breast. For the best eating experience all you have to do is follow these simple steps:

1. Thaw duck breasts and remove from package. Pat duck breast dry with paper towels.

2. Score skin into \(\frac{1}{4}\) inch intervals, being careful not to cut into breast meat. Rotate breast and score again, making a criss-cross pattern. Season with preferred seasonings/marinades.

3. Preheat griddle to 325°F or nonstick pan to low-medium low. Place breast skin side down for approximately 8–12 minutes or until fat is rendered and skin is crisp and brown. Low and slow is the way to go.

4. Turn breast over and cook 1–2 minutes.*

5. Place duck breasts in a 350°F oven for 5–6 minutes or until internal temperature reaches 155°F. Let product rest 4–5 minutes before slicing. Temperature will continue to rise during resting period and should reach 165°F.

---

*At this point, you can remove from heat, place in a sealed container, and refrigerate up to three days before finishing in the oven or on a grill.

Grilling Duck Breast

1. When grilling boneless duck breasts, you will achieve the best results by starting the cooking process indoors and later moving them to the grill.

2. First, render the fat from underneath the skin in a skillet on the stove (8–12 minutes over medium low heat). At this point you can refrigerate the breasts until ready to grill.

3. Heat grill to medium high. Place duck breasts, meat side down on grill and cook for 5 minutes. Turn over and finish for 2–3 minutes. Internal temperature of the duck breast should be 155°F. Let rest five minutes before slicing.
