

## FOCUS

Maintain a balanced program that is ethically grounded, verifiable, economically viable, supported by stakeholders, and builds consumer trust and confidence in Maple Leaf Farms.

# SUSTAINABILITY

## FACT SHEET

## Successes

### Waste and Recycling Program

- Working with our service providers we have increased recycled pounds by as much as 42%, in turn decreasing the amount of waste material going to landfill.

### Water Conservation Program

- Water reduction and / or re-use initiatives throughout our Midwest Operations have reduced water usage by more than 30%.

### Energy Conservation Program

- Process improvement and consolidation efforts have reduced electrical consumption by 16% and natural gas usage by 30%.
- A lighting upgrade planned for our Distribution Center later this year is expected to reduce the energy necessary to support lighting in that area by 58%.

### Awareness Communication Program

- Ongoing measuring and monitoring
- Informing stakeholders of the our sustainability effort through internal communication and our website
- Evaluation of our programs, both internally and by our service providers
- Find new ways to reduce, re-use, or recycle
